Naples and Mount Vesuvius, from Corso Vittorio Emanuele.

14:40, Thursday 17th October, 2019. Maria Mitsoula.

This catalogue is part of a collection published by the Edinburgh School of Architecture and Landscape Architecture (ESALA), Edinburgh College of Art, University of Edinburgh. It documents student design work produced in the Master of Architecture (MArch) programme in 2019-20. Each catalogue describes one of the following five design studios in the MArch programme. The full collection is available to view online at issuu.com/eca.march.

Catalogues 2019-20:

City Fragments: Neapolitan Porosities.

Ecstatic Objects: Santiago de Compostela.

Fire-Space: London.

island territories vi: MANHATTAN *scapeland*.

Superinfrastructures. Supercities. SuperDutch: [Dutch] Territorial
[Machine] Fictions.

COVID-19

During the final weeks of the academic year, the work of the MArch programme was interrupted by the Covid-19 pandemic. University buildings were closed, and staff and students were required to work remotely, maintaining contact and sharing work via digital means. The work presented through the 2019-20 MArch catalogues is therefore testament to the continued invention and resilience of the student body and commitment of the MArch programme staff.

CITY FRAGMENTS: NEAPOLITAN POROSITIES

"The city is craggy. Seen from a height... it lies deserted in the dusk, grown into the rock. Only a strip of shore runs level; behind it buildings rise in tiers... At the base of the cliff itself, where it touches the shore, caves have been hewn... a door is seen here and there in the rock. If it is open one can see into large cellars, which are at the same time sleeping places and storehouses. Farther on steps lead down to the sea, to fishermen's taverns installed in natural grottoes... As porous as this stone is the architecture. Building and action interpenetrate in the courtyards, arcades, and stairways. In everything the scope to become a theatre of new, unforeseen constellations. The stamp of the definitive is avoided."

Walter Benjamin and Asja Lācis.

Descending from Castel Sant'Elmo through the steep streets of Pallonetto to the caves at the coast, Walter Benjamin and Asja Lācis trace a section through Naples. They recount overlapping spaces, arcades and alleyways, taverns and tenements, whitewashed churches and dirty courtyards, narrating the unexpected experiences provided by passing through a curtain, or glancing down a stair. Through this section they articulate an urban condition specific to the city: Naples, they declare, is porous.² In the tight alleys (*vico*) of Naples, buildings are "divided into innumerable, simultaneously animated theatres."³ Everyday affairs intermingle with public performance, "building and action interpenetrate," "the living room reappears on the street... the street migrates into the living room."⁴

1 Walter Benjamin and Asja Lācis, "Naples," in *Reflections: Essays, Aphorisms, Autobiographical Writings*, ed. Peter Demetz (New York: Schocken Books, 2007 (1978)), 165-6.

2 Graeme Gilloch notes: Benjamin's "writings on Berlin and Paris explore the character of the bourgeois domestic setting, and identify the internalization of social activity as a distinctive feature of modern capitalist society. In Naples, such a transformation occurs in reverse... the private bursts out of its confines and erupts into the public gaze... the public invades and pervades interior settings." Graeme Gilloch, *Myth and Metropolis: Walter Benjamin and the City* (Cambridge, UK: Polity Press, 1996), 26-27.

3 Benjamin and Lācis, "Naples," 167.

4 Benjamin and Lācis, "Naples," 171.

Houses above Vico Tronari, Rione Sanità.

11:29, Monday 14th October, 2019. Maria Mitsoula.

Distinctions between private and public, inside and outside, collapse. This porosity is all-pervading. Dreams clash with deformities, fantastic reports with grey reality, grottoes and cellars, construction and ruin.

Once invoked, the term has become difficult for Naples to shed. “Porous matter,” as Iain Chambers reminds us, “absorbs whatever it encounters,” and since Benjamin and Lācis offered the description in 1925 Naples has completely absorbed the term.⁵ In the intervening century however, Neapolitan porosity has become not just a quality or description, but a way of conceiving being Neapolitan. The notion of porosity is no longer limited, as Pellegrino D’Acierno observes, to the spaces of the city (the “Baroque interplay” of public and private space, a “psycho geography that lacks boundaries”), but is evident in the traits of Neapolitan cinema (Vittorio de Sica’s *L’oro di Napoli* or Rossellini’s *Viaggio in Italia*) or the intertwining narratives of local fictions (the lives described through time in Elena Ferrante’s “Neapolitan novels”).⁶ It describes an ‘interplay,’ ‘intrusion,’ ‘penetration,’ ‘punctuation’ of various physical, material and social conditions.⁷ Porosity, as a term and concept, has passed deep into Naples’ pores, and in passing has shifted from Benjamin and Lācis’ original description, absorbing subsequent interpretations, and swelling into abstraction.

But as originally invoked, Neapolitan porosity as a conceptual, social position is anchored in a material reality. The volcanic landscape crafted by Vesuvius to the east and the Phlegraean Fields to the west is intrinsically porous. Soft, sponge-like tuff stone, or *tuffo*, formed from the compression of ash from volcanic eruptions extends from the slopes of volcano to the seams beneath the city. Benjamin and Lācis describe the city as “grown into” this stone, with “taverns installed in natural grottoes;” the architecture of Naples becomes “as porous as... stone.”⁸ The ground and the city interpenetrate; as with the living room and the street, one exists within the other. The caverns beneath the city, formed by geological and hydrological processes, are enlarged, occupied, programmed, re-programmed and abandoned; *tuffo* is cut from volcanic seams to build

6 Pellegrino D’Acierno, “Introduction. Naples as Chaosmos or, The City That Makes You Repeat Its Discourse,” in *Delirious Naples: A Cultural History of the City of the Sun*, eds. Pellegrino D’Acierno and Stanislao G. Pugliese (New York: Fordham University Press, 2019), 12-14.

7 Some of the terms used in D’Acierno’s ‘Introduction’.

8 Benjamin and Lācis, “Naples,” 165.

the city, exhausted quarries are abandoned and occupied. The city grows both into and out of the rock. Architecture provides a material substance through which the various conditions of porosity permeate and are made manifest.

For all its porosities, as Pellegrino D'Acerno notes, Naples is "the supreme aporetic city,"⁹ a city that is irreconcilably immobile, contradictory. Alongside the fluidity of de Sica or Ferrante, are blockages. Employing James Joyce's portmanteau 'chaosmos' (chaos and cosmos) D'Acerno describes, by way of an example with increasing contemporary relevance, the mutually supporting interplay of slow, ineffective, legislative bureaucracy and illegality, or the many varying translations of the expression 'vedi Napoli e poi muori', the most frequent of which being 'see Naples and die'. These aporia are frequently seen as impediments, things which must be cleared in order for the city to retain its (by implication, desirable) porosity.¹⁰ This opposition is too blunt. As Andrew Benjamin notes in his reading of Benjamin and Lācis, Neapolitan porosity "refuses to position the private and the public as a productive opposition... [it] brings both the public and the private into play but freed from their ready insertion into a simplifying opposition."¹¹ Without this re-articulation of public-private relations, porosity "would be no more than a spatial description... no more than courtyards that led to arcades or vestibules which in turn lead to ante-chambers and finally to inner rooms..."¹² The porous and the aporetic are necessarily co-present conditions, one condition is a necessary pre-condition for the other. It is this difference that Benjamin and Lācis, one might suggest, have in mind when they declare that in Naples the "stamp of the definitive is avoided," that "no figure asserts itself "thus and not otherwise","¹³ or when D'Acerno notes that "the supreme aporetic city gives the *pernacchio*... to those who wish to finalize and objectify its openness and to bypass its difference."¹⁴ The porous-aporetic city shuns objectification, the reduction of its complexities to simple programmatic

9 D'Acerno, "Naples as Chaosmos," 15.

10 A description of the book *Aporie napoletane. Sei posizioni filosofiche* emblemizes this dialectic: the authors of the book, the publisher's description notes, "try to indicate which ways to go to favour the porosity of the city and a freer life for Neapolitans" without hiding "the serious problems, obstacles, the "aporias" of the city." "Aporie napoletane. Sei posizioni filosofiche," Cronopio Edizione, 19th March, 2006, <http://www.cronopio.it/edizioni/2006/03/aporie-napoletane-sei-posizioni-filosofiche/>. Amato Pierandrea. *Aporie napoletane: sei posizioni filosofiche* (Napoli: Cronopio, 2006).

or organisational gestures. As Iain Chambers notes, Naples “proposes an interruption and interrogation of our inherited understanding of urban life, architecture,” it “reintroduces the uneven and the unplanned, the contingent and the historical” into thinking on the city.¹⁵

It is this unevenness that is our concern in *City Fragments: Neapolitan Porosities*. For Chambers, porosity becomes a counter-narrative to the tyranny of progress, “a potential paradigm of the city after modernity.”¹⁶ For Benjamin and Lācis, architecture articulates the city’s resistance to fixity; “architecture, the most binding part of the communal rhythm, comes into being” in Naples in the intersection of the “civilized, private, and ordered” great hotels and the “anarchical, embroiled, villagelike” city centre.¹⁷ *City Fragments: Neapolitan Porosities* investigates this intersection of conditions, and architecture’s role in fostering or framing such an intersection (in architecture becoming a medium through which passage is registered). The work documented in this catalogue seeks to interrogate such a porosity as a condition in relation to the specific geographic (hydrological, edaphological, geological, and so on), social and urban conditions of Naples, and as a framework for developing an architectural agenda that defies calls to fix, to smooth, or to regulate.

Implicit in all descriptions of porosity is movement. The porous city is not a static city. “It will be movement itself that constitutes the urban and thus defines the city;” “movement comes to define the way in which space is both contrasted and then worked within.”¹⁸ This movement is at the core of Andrew Benjamin’s ‘working through’ Benjamin and Lācis’ text, and of his deployment of that text as a means of thinking about the city. Taking movement as central to porosity entails re-thinking our representational conventions. Benjamin notes: “Once movement is taken as central and the lines involved have to capture a dynamic process then what emerges is the need for a representational device adequate to such an undertaking.”¹⁹ For Benjamin, animation software is this device, in that it overcomes the perceived stasis of the line as a device for delimiting particular territories, and instead reinforces the provisional and temporal nature of territory.

Alternatively, one must explore how the drawing becomes a territory in itself, enacting and recording temporalities. Eight such drawings structure this catalogue, prefacing a series of individual and collective architectural proposals developing the animations and porosities of Naples (the tectonics of *tuffo* and spaces of collapse and excavation; the intersection of realistic fictions and implausible facts; intersecting historic and contemporary rituals and practices; religious and touristic processions and passages; morphological, architectural and artistic figures; myths and fictions of the ground and landscape; medical, clerical and sculptural bodies; and the publicity and privacy of threshold conditions). These drawings do not describe fixative prescriptions for the city (nor curative ones, for that matter), conscious as ever of the reverberations of the Neapolitan *pernacchio*. Rather, they explore how the drawing might begin to hold gestures (be it the gesture of drawing, of pouring or, to recall Benjamin and Lâcis, of the ordering of coffee).²⁰ This expanded understanding of drawing posits drawing as a process, rather than drawing as an output from a given process (as means, rather than end). Drawing becomes, as Jean Luc Nancy describes, an “opening of form... opening in the sense of a beginning, departure, origin, dispatch, impetus, or sketching out and opening in the sense of an availability or inherent capacity.”²¹ In these drawings is an architecture (sometimes they are drawings of architecture, sometimes they are architectural drawings). The drawings become sites, recalling Benjamin and Lâcis, in which “building and action interpenetrate,” and in which there is scope for the city “to become a theatre of new, unforeseen constellations.”²²

This catalogue documents the architectural investigations undertaken in the Master of Architecture studio **City Fragments: Neapolitan Porosities**, exploring the city of Naples in the 2019-20 academic year. It is the second in a series of two-semester MArch Modular Pathway studios exploring cities and themes framed by the idea of the fragment (figure) as articulated by architectural historian Manfredo Tafuri, and Franco Cassano's *Southern Thought* (developing from the writings of Albert Camus), which describes how the relationship between the geography of the Mediterranean and its social and urban formations informs a particular way of thinking about architecture, the city and landscape. It follows the studio **City Fragments: Palermo Institutions**, undertaken in 2018-19.

OF/ON/OVER TUFO

ARCHITECTURES OF AN UNCERTAIN GROUND

RACHEL BRIGLIO | HOLLY POULTON | MALIINA TOIVAKKA | HANNAH WILLIAMS

Naples is sinking; the city is undermined by an unreliable substratum, disturbed by sinkholes, landslides, earthquakes and disease. Unlawful construction has moved up the slopes of Vesuvius, as inhabitants forget the nature of the ground they occupy. Concrete constructions within the city have led to collapses in the caverns below, giving new urgency to the adage that Naples is built on nothing. *Of/On/Over Tufo* seeks to re-engage Naples with its ground, reminding the city of its volcanic substrate, and that uncertain ground can form the basis for rethinking how Naples builds in and of itself. Rione Sanità (*sanità*, noun. *health*) stands guard over the highest number of subterranean caverns—many undocumented—in the city. As the city grows upward, Sanità looks down. The skulls of unknown dead are watched over at the catacombs of San Gaudioso, San Gennaro and San Severo, and caverns are utilised by locals to park, store and live. The health of the population of this once-prosperous district is failing, as is the health of its subsoil. The architectural proposals explored in *Of/On/Over Tufo* are aware of the uncertainties of this Neapolitan landscape and the precarious conditions of Sanità, but also of the intertwining material history of Naples, its people and its substrate: *tufò*, or tuff stone. A series of social amenities and workshops exploring ground conditions and tectonics reinforce the essential nature of a healthy relationship with ground. New gateways brace the Lotti and Tronari Quarries that allow those working with, on and over ground (fabricators, surveyors, performers) to operate in dialogue with the adjacent Osservatorio Astronomico di Capodimonte.

RACHEL BRIGLIO | HOLLY POULTON | MALIINA TOIVAKKA | HANNAH WILLIAMS | **OF/ON/OVER TUFO**

Programmatic Densities *Of/On/Over Tufo*

Programmes of different scales and formalities—from study pods to a grand amphitheatre—and architectural elements are classified as 'Of' and 'On' tufo (below), and 'Over' tufo (above). Those 'Over' tufo hold public libraries, teaching spaces for music and a planning archives for Naples, and multi-purpose community spaces. Their elevated position reinforces connections to Rione Sanità.

Earthworks *Of/On/Over Tufo*: Glassworks and Stoneworks

Perspective Site Section: Glass Studios, Workshops, Accommodation.

Of/On/Over Tufo suggests new methods of occupying Naples' surface, adapting to shifting ground. The proposals reinforce, brace and prop the quarries, linking facilities in Rione Sanità with the substrate beneath. From here, *Of/On/Over Tufo* looks to the district's most vulnerable to anthropogenic earth movement, the wider context of Rione Sanità and the Quartieri Spagnoli.

A DREAM OF NAPLES

INSCRIBING REAL FICTIONS & FICTIVE REALITIES

SOPHIA BHARMAL | JOANNA HOBBS | KATE MURPHY

"...as soon as he had gone through Porta Capuana, he looked back and began to say, 'Here I go, my beautiful Naples, I'm leaving you! Who knows if I'll ever see you again, bricks of sugar and walls of sweet pastry, where the stones are manna in your stomach, the rafters are sugarcane, the doors and windows puff pastry? ... Farewell, flower of cities, glory of Italy, painted egg of Europe, mirror of the world! Farewell, Naples...'"¹

In Naples, flower of cities, the line between the fictional and the real is unclear. Outside Chiesa di San Gregorio Armeno, craftsmen prepare expansive nativity scenes (*presepe*) in which the Madonna meets Maradona. In nearby Sanità, residents visit an underground city to tend the adopted skulls of abandoned souls (*capuchella*). Everyday occurrences are as remarkable as fictions, lending fictions the plausibility of fact. Nicola Pugliese's depiction of Naples in *Malacqua* explores this blurring. The novel, first published in 1977, combines documentation of the realities of the city in the 1970's with satire; the tyranny of Camorra control, failures of waste management, and the incompetence of the municipality are embodied by four days of relentless rain, which drown and disintegrate Naples. *A Dream of Naples* traces contemporary facts (waste dumping, limited recycling, and poor public toilet provision) and fictions (Ospedale delle Bambole, *Malacqua*), inscribing new plot lines from reality into and onto the city. Through a series of extraordinary everyday spaces for protagonists both real and fictive, and an unconventionally conventional set of recycling facilities for ceramics, glass and textiles, it invites entry into the fictive reality of

Naples, once the capital of the maritime Kingdom of Two Sicilies and now a major port city in the Mediterranean, is a place of chaotic contrasts. Poor urban planning and reconstruction after World War II, recent technological advances, industrialisation and inconsistent investment have transformed how the city and its economy are structured. Large sections of the historic city walls were demolished to make way for a highway connecting the port to new industrial suburbs, replacing a protective porous interface for people and goods with a physical barrier between the city and the sea. Taking Thomas Jones' painting *A Wall in Naples* of 1782 as a material and formal record of pre-unification Naples, *A Wall in Naples* develops new market typologies from those of the old city, still evident in the ruins of the Roman agora beneath the Monastery of San Lorenzo, in the fish markets of Porta Nolana, and as documented in Domenico Gargiulo's painting *Piazza Del Mercato* (1648-52), which depicts a scene in the marketplace during the Revolt of Masaniello in 1647. In these historic markets, products from distant lands were unloaded, stored, prepared, exchanged and sold. A series of new interfaces bridge two urban conditions: the street markets of the historic city and the industrial and commercial zones of the post-war port. Echoing the route from the ancient agora to the waterfront, and the social urgency of Gargiulo's painting, *A Wall in Naples* proposes a market boulevard from Porta Nolana to the port, a new 'gate' in the (ghost) city wall, and a series of hinges forming social, economic and material gateways through which wine, fish, cheese and fireworks are made present in the city.

PULCINELLAN PROCESSIONS

RE-FIGURING (BAROQUE) INTERIORS AND PLOTTING THE
PAGEANTRY OF RIONE SANITÀ

COSTANDINOS CAMBANOS | GAVIN MOLYNEAUX

Pulcinellan Processions occupies the ‘Baroque village’ of Rione Sanità in the valley between historic Naples and the Capodimonte hills, a district now cut off from the city by the Ponte Maddalena Cerasuolo built by the Bonapartes to expedite the royal procession from the Palazzo Reale to the Reggia di Capodimonte. Cutting across this royal procession, *Pulcinellan Processions* plots a new path through Sanità, passing baroque churches, Spanish staircases, the Napoleonic Bridge, ancient monasteries, and subterranean catacombs. This path pulls together everyday, idiosyncratic practices specific to Sanità and the pilgrimage undertaken by growing numbers of tourists and visitors along the Holy Mile (*Miglio Sacro*) between the Catacombs of San Gennaro and Porta San Gennaro. Taking the socially-diverse figure of Pulcinella—a *commedia dell’arte* character popularised by Neapolitan puppetry—as a guiding device, it proposes architectural interventions that reconnect Sanità to ‘Upper Naples’, adding to the existing processions of royals and relics a new Baroque performativity. Following Walter Benjamin’s descriptions of retreating into the sanctuary of baroque churches, *Pulcinellan Processions* creates new interiors, tied together as a series of re-figured interiorities. The *Toto’ Cinematheque* creates a vertical connection adjacent to the Napoleonic Bridge. It archives and screens Neapolitan films, including the works of Sanità native Toto’. *Pulcinella’s Living Room* creates a connection between Sanità and Chiesa di Santa Maria della Vita, gesturing towards the Cimitero Delle Fontanelle. It serves as a resource for locals, a visitor centre for Sanità and a sanctuary for the pilgrims.

THE SEVEN ACTS OF NAPOLI

POURING, SPLITTING, SWELLING, SKINNING, GUTTING, PATCHING, & STITCHING

ANNA MCEWAN | GEORGE POP | EVELYN SUNG

α *Act One - Ancient Naples - Pouring - Refresh the Thirsty.*

The Romans build aqueducts to bring water into Neapolis; the *Decumani Inferiore* (*Spaccanapoli*, lit. *Naples Splitter*) spreads east to west.

ψ *Act Two - 11th Century - Splitting - Visit the Imprisoned.*

Under Norman occupation Naples flourishes; the city splits its bounds.

λ *Act Three - 16th Century - Swelling - Feed the Hungry.*

Napoli becomes the largest city in the Spanish Empire; Jusepe de Ribera is born in Xàtiva, Spain, and relocates to Naples via Rome.

θ *Act Four - 17th Century - Skinning - Bury the Dead.*

A deadly plague wipes out half of the population of Naples; Vesuvius erupts; Caravaggio flees Rome for Naples and paints *The Seven Acts of Mercy*.

μ *Act Five - 19th Century - Gutting - Visit the Sick.*

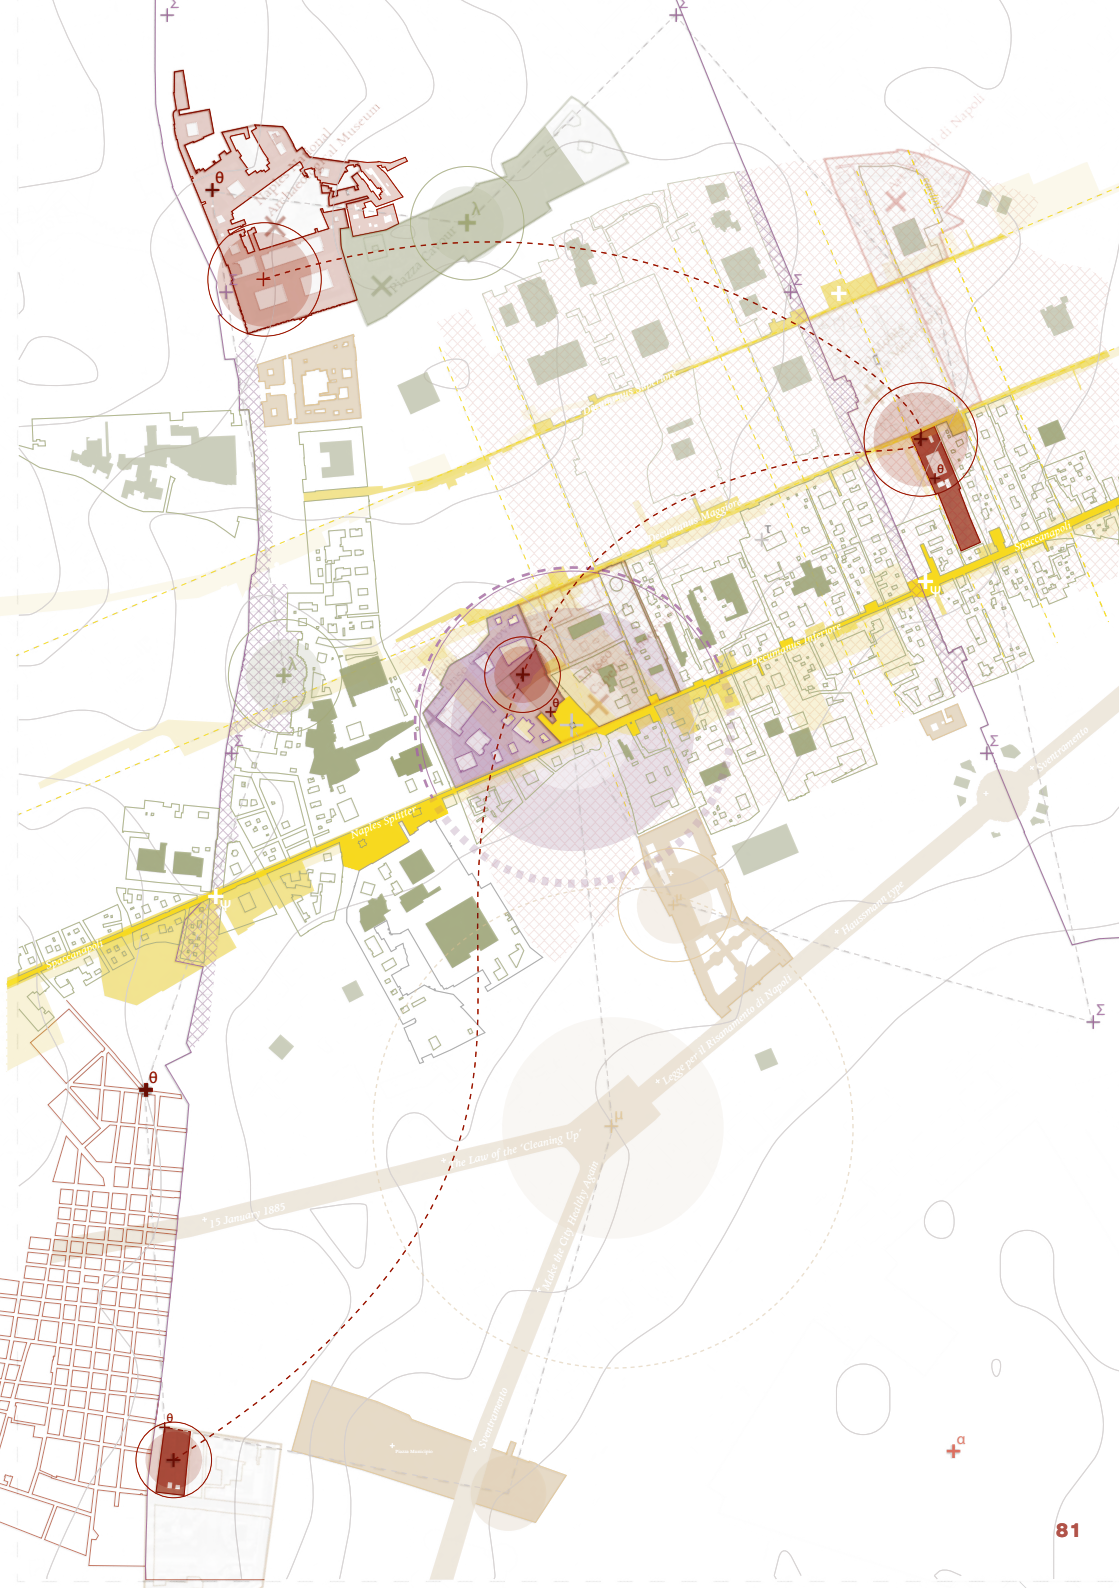

Risanamento, lit. *making healthy again*; swathes of the city are cleared for redevelopment (informally known as *Sventramento*, lit. *gutting*).

ν *Act Six - 20th Century - Patching - Shelter the Homeless.*

Allied bombs rain down on Naples; Neapolitans shelter in the city's caverns; Chiesa Santa Chiara on Spaccanapoli is destroyed and rebuilt.

ξ *Act Seven - 21st Century - Stitching - Clothing the Naked.*

The Seven Acts of Napoli stitches histories of Naples into three architectural proposals: vocal halls where stories are heard; ateliers where paintings are restored; and a gallery for the works of Carravaggio and Ribera.

(EX)POSING GROUNDS

RECONNOITRING NEAPOLITAN (SUB)SURFACE NARRATIVES

OANA GAVRIS | ALEXANDER RONSE | NAOMI WRIGHT

Naples shakes, tremors, shifts. Chambers beneath Vesuvius swell and empty, uplifting ground and causing subsidence. Earthquake swarms rock the city, reminding Neapolitans of the threat of eruption. To build in Naples is to inhabit precarious ground.

Monte Echia transects central Naples, carrying military institutions on a precipitous topography rising from Castel dell'Ovo, through Caserma Nino Bixio, and summiting at Castel Sant'Elmo. These points act as datums along a line, points against which one might anchor oneself within a fluctuating landscape. From these points, *(Ex)Posing Ground: Reconnoitring Neapolitan (Sub)Surface Narratives* surveys an urban territory that is cut, etched and formed by the shifting grounds beneath. Through a series of proposals along the ridge it investigates how architecture might adapt to these tectonic conditions, forming new gauges through which seven distinct grounds might be recognised: the *Geological*, *Displaced*, *Manufactured*, *Excavated*, *Mythological*, *Effaced* and *Prospective*. Two new architectural anchors embed themselves within these seven grounds. *Sedimenting Myth in the Cavern of Mithra*, makes incisions into and forms extensions of *Prospective* grounds, creating a theatrical journey linking *Mythological* and *Excavated* grounds through performance spaces. *Archiving & Unearthing Pallonetto* reconnoitres the disintegrating cliff of Monte Echia and reinstates *Effaced* ground through a suspended archive above the fragile *Displaced* terrain below, anchoring and binding the derelict *Manufactured* ground of the ridge.

06a

SEDIMENTING MYTH IN THE CAVERN OF MITHRA

OANA GAVRIS | NAOMI WRIGHT

Exploring Naples' hidden territories, *(Ex)Posing Ground: Sedimenting Myth in the Cavern of Mithra* develops a programme through multiple architectural figures, each aligned with particular (sub)surface narratives. The constant state of geological unrest in and around Naples has, paradoxically, led to a tendency to disregard the ground as a latent or patent condition. The ground is treated either as an infinite resource (tufo hills hollowed out to the point of causing sinkholes and cave ins) or as an inconvenience to be removed or re-shaped to make room for new urban developments. The consequence of such an indifference is "an almost terminal insensitivity to the rich subtleties of the teeming wild, the variegated forms and materials of the landscape, the nuanced patterns of urban texture and the rituals of the everyday" that these grounds afford.¹

Sedimenting Myth in the Cavern of Mithra seeks to reclaim the dynamic connection between the city and landscape, exploring potential fractures between categorised conditions to create a theatrical performance, a space in which the lost grounds of the fairy-monk Monaciello, who roams the caverns below the city, are recreated, or the screams of the Witch of Vesuvius might be heard once more.

ARCHIVING & UNEARTHING PALLONETTO

ALEXANDER RONSE

Through a series of proposals along the ridge, *(Ex)posing Ground: Archiving & Unearthing Pallonetto* investigates how architecture might adapt to the precarious tectonic conditions of Naples, forming new gauges through which seven distinct grounds (*Geological, Displaced, Manufactured, Excavated, Mythological, Effaced* and *Prospective*) might be recognised.

New architectural anchors embed themselves within these seven grounds. *Archiving & Unearthing Pallonetto* reconnoitres the disintegrating cliff of Monte Echia. It reinstates *Effaced* ground lost in a previous landslide through a suspended archive of drawings and charts above the fragile *Displaced* terrain below, anchoring and binding the derelict *Manufactured* ground of the ridge.

The intervention is a vertical assemblage of the city, linking the plateau of Monte Echia with Santa Lucia below.

CORPORA NEAPOLITANA

SAINTS, SINNERS, SKINS, SURFACES AND SURGEONS

TOUFIQ ANDRY | ALEX MORIARTY

Serenalla Iovino describes Naples as a body, “a porous body inhabited by other porous bodies, a mineral-vegetal-animal aggregate of porous bodies.” Naples is an “accumulation of bodies,” an amalgam of “mythical bodies... of bodies used as “anatomical machines”... of marble bodies covered with marble veils... of living human bodies.”¹ Naples hosts bodies of flesh, bone and stone. These *Corpora Neapolitana* occupy a city pre-occupied with bodies. Even the terms for historic redevelopments of the city (*risanamento*, meaning “healing”, and *sventramento*, “disembowelment”) are bodily. To understand Naples, *Corpora Neapolitana* conceives of the city as a body, as a series of diffusions, organs, fluxes, as flows of corporeal and non-corporeal events. Scanning this body, the rigidity of events, organs, structures, dissolve, and re-assemble into a new body system. Naples reveals her porosity.

Behind the thick *tuffo* walls that seemingly separate city and cloister is an intense world, as animated as the streets beyond. Here, in Naples’ in-between spaces, clerical, student, cultural, medical, and vegetal bodies mingle. Within the University Hospital complex a new body system opens up ancient monastic walls, reactivating lost cloisters, and carving out retreats to form a restorative landscape. Spaces of bodily practices—a General Practitioner’s Facility and Postnatal Care Centre—dress Naples in a new skin, grafted onto the walls.

(UN)DOING THRESHOLDS

DOOR / WAYS TO NEW NEAPOLITAN PRACTICE(S)

JOE COULTER | EIRINI MAKAROUNI | KATERINA SARANTI | KATY SIDWELL

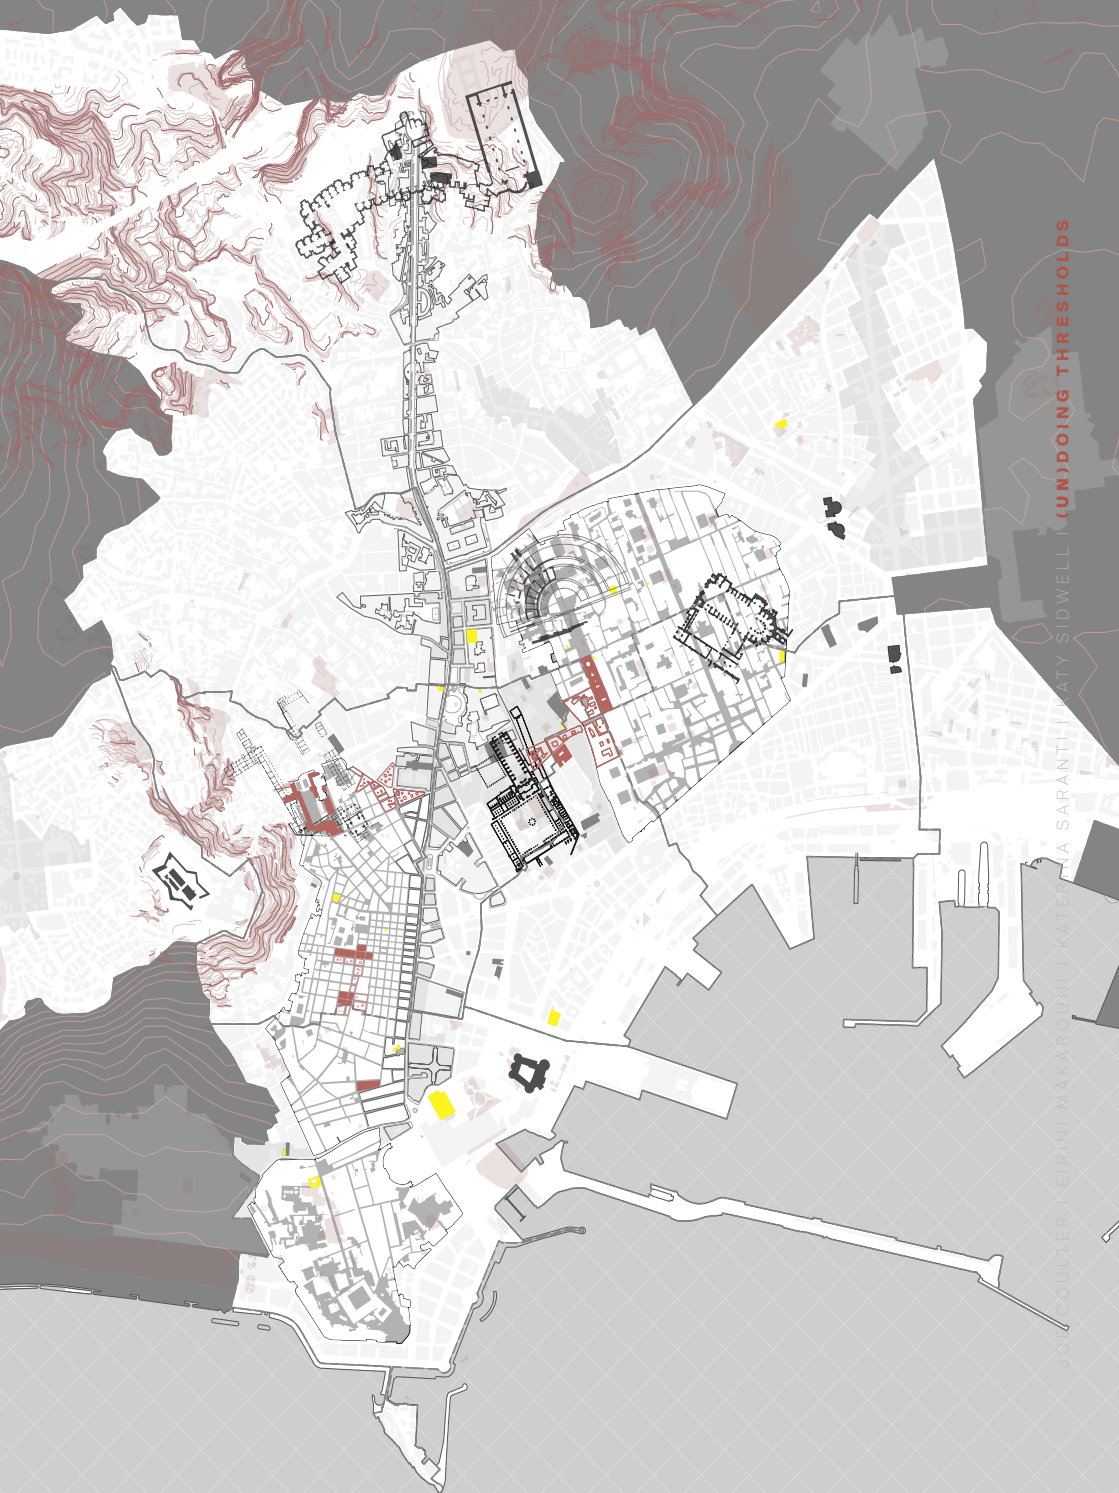

(Un)doing Thresholds explores the temporalities and architectonic specificities of porous conditions in Naples, a place in which *(un)doing* is—as described by Andrew Benjamin—a process vital to the formation of the city, one in which porous architectures are *(un)done*, drawn through one another in a constructive overwriting founded in and based on the immediacy of the city. Exploring architectures of the 'ruin', 'labyrinth' and 'theatre' as framed by Graeme Gilloch's reading of Walter Benjamin and Asja Lācis description of Naples, *(Un)doing Thresholds* considers the interpenetration of these three 'porous' typologies, be they programmatically labyrinthine, theatrical or ruinous, or materially or spatially so.

In such an architecture, spaces become thresholds to other spaces, gathering people into collectivities in a manner that enables a form of possession of space in which an experience of Naples is constructed where the social politic evades the rigidities and restrictions of bureaucracy and antiquity. An operative tectonic language of performativity and mobility, extends, encloses, makes present and gathers spaces between things, providing separations from and thickenings of the spaces of the city. Through a methodological commoning—a making-common and a making-in-common—*(Un)doing Thresholds* brings disparate sites and functions into relation. These sites look to the *Santissima Trinità delle Monache*, an abandoned monastery on the hill above Montesanto, creating *Door / Ways to New Neapolitan Practice(s)* through social amenities for residents of the Quartieri Spagnoli.

08a

INTO & OUT OF EVERYDAY THICKNESS(ES)

JOE COULTER | EIRINI MAKAROUNI

'Into & Out of Everyday Thickness(es)' brings a density of the everyday to Santissima Trinità delle Monache by re-establishing programme(s) of a domestic scale and nature, and transcribing the thickness of the Spanish Quarters into the site where in a porous *'(un)doing'* at the corner where the monastery encounters Vico Paradiso into Montesanto.

Together, the proposals fold into and out of each other, creating a series of threshold connections that overwrite the existing site as a *'ruinous'* condition of the city and which become *(un)done*, promoting the uncertainty and dislocation of the *'labyrinth'*. *'Theatrical'* skins perform to choreograph spatial conditions and operate to the specificities of given fields within which the *'bassi'*, *workshop* and *bathroom* function.

08b

(IN)BETWEEN URBAN THICKNESS & VOID

KATERINA SARANTI | KATY SIDWELL

'(In)Between Urban Thickness and Void' responds to the public and institutional functionalities of the former monastery, reconfiguring these programmes into a contemporary rewriting of the southern side of the monastery garden, where the monastery complex meets the neighbouring *Quartieri Spagnoli*.

As a pair, the proposals put the terms *Ruin*, *Labyrinth*, and *Theatre* into practice, using them to determine and test programme and spatiality in an *'(un)doing'* that challenges, produces and thickens thresholds within the site and outwards across the city. In response to their situation, the Gallery and Library employ an architectural language of void, thickness and performance at different scales, in an urban reconfiguration of the edge of the site.
